ESTIMATE 0624 · ONE EVENT DAY

What you're paying for

HELLHOUND AUDIO

Screens	Big TVs so people in the back can see. Six TVs, 55″ up to 85″. The bigger the screen, the more it costs to rent. Each one gets set up, wired, and tested so they all show the same picture at the same time.	**$2,200**
Cameras	Three cameras film the event and send it to the screens and online. These aren't regular cameras. One tech steers and zooms all three with a joystick, and a video switcher picks the best shot live, like a TV control room. That's the difference between looking like TV and looking like a phone video.	**$1,710**
Crew	Three people who run all of it for you, all day. A lead sound engineer, a video tech, and a sound helper. They arrive before your guests, set up and test everything, and fix problems before anyone notices. Without them, the gear is just boxes.	**$1,700**
Sound	Microphones and speakers so everyone can hear. Two podium mics (one cordless, as a backup), mics and stands for performers, and every cable to hook it all up.	**$550**
Delivery	We bring it, set it up, and take it home. Loading, driving, unloading, and packing it all back up at the end.	**$500**
Podium	A stand for your speakers to talk from.	**$200**
Total	No tax. Nothing hidden.	**$6,860**

Questions? Let's talk.

Happy to jump on a Zoom, a call, or whatever's easiest, and walk you through any of it.
